

Pool & Fountain Lighting

A swimming pool is not only a place to swim but also an object of beauty and night time illumination is the most effective way to enhance the beauty of a pool. The DAYLIFF range of underwater lighting equipment has been specially selected for performance and quality and a wide range of options are available including tungsten sealed beam niche lights and low energy LED lights. Also available are related accessories including deck boxes and transformers.

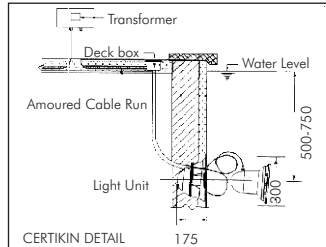

CERTIKIN NICHE LIGHTS

Certikin Niche Light **Certikin Quick Change**

Quick Change with SS Facia

Sealed beam niche lights are specially designed for installation into concrete and masonry walls and feature a separate niche into which the sealed lamp unit is fixed. This arrangement provides for simple bulb replacement without lowering the pool water level. The two light types are available from Certikin and are fitted with 300W wide flood sealed beam 12V bulbs. Stainless steel finish rims are also available separately for quick change lights.

Alternative PAR56 LED bulbs in White, Blue and Multi-Color are available ranging from 12-18W to convert incandescent sealed beam lights to LED.

DAYLIFF LED NICHE LIGHTS

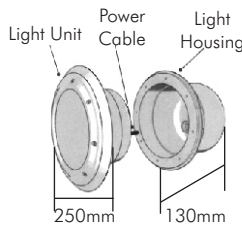

Supreme White/Blue - 6W Color - 16W

Dayliff White - 12W Color-18W

Supreme S/5 White/Blue-5.5W

Eco-light

LED lights are the latest technology in pool lighting offering low energy with high performance and giving low operating costs and greatly extended bulb life. Various 12V models are available including 6W and 12W White and Blue diffused light and 18W seven colour changing light with option of a separate remote control and radio wave enabled receiver for the Poolmaid model.

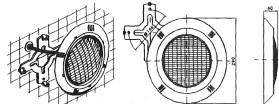

The Lights are provided with 2m cable.

DAYLIFF LED FLAT LIGHTS

Coloured 18W white 6W

Dayliff Coloured 18W white 6W

Flat wall LED lights are suitable for both existing pools and new installations as an alternative to the niche type. Lamps are provided with a mounting bracket which is screwed to the pool wall and can be easily detached for bulb replacement.

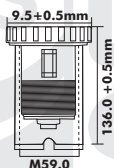

Available in White, Blue or Colour configuration for Poolmaid and White and Colour for Dayliff models.

SMALL DIAMETER POOL LIGHTS

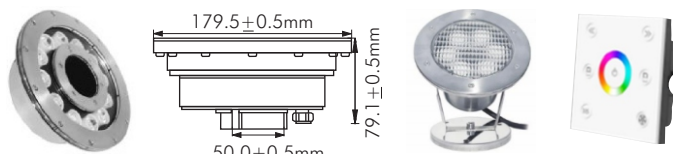

Concrete 3W Wall Light

Recessed lights

Small diameter lights have diameters up to 100mm and are mostly suited for spa or pool steps. They feature 3W White, Blue and colour LED lights with a 120° beam angle and are IP68 rated.

FOUNTAIN LIGHTS

Jet Uplighter 18W

Fountain Light 12W

These are special lights for water features. The LED uplighter is supplied complete with a 50mm provision for installing a fountain jet while the floor mounted fountain light has a swivel stand with screws for mounting. They are available in 12W single & 18W colour LED lights with a 60° beam angle and are IP68 rated. An RGBW Touch panel with 10 lighting modes is available to synchronize multiple lights. The panel can vary speed of changing and brightness. The connection distance of the controller is 50m.
